1. Learning outcomes
Students will be able to categorise the most important basic concept of economics, apply the essential microeconomic models, use them to independently analyse economic decisions regarding budgets and companies in markets of various forms and evaluate these in view of efficiency aspects that question the assumptions typically underlying the microeconomic models. They will also be able to explain and assess the benefits and limitations of using these models in economic analysis, apply normative concepts to economic policy issues and assign current issues of the business press to the subject fields of microeconomy.

2. Recommended prior knowledge and skills
General knowledge of mathematics (A-level equivalent in mathematics) or preparatory course B1

3. Contents
- Subject and issues of economics
- Division of labour as a basic principle of market economy, barter economy vs. monetary economy
- Demand and supply of goods, consumer and producer surplus, elasticities
- Fundamental market mechanisms, market failure
- Theory of budgeting (consumer theory)
- Company theory (production and cost theory)
- Supply and demand of goods according to production factors
